The Client

Silva Care is a community service for adults with learning disabilities & people with Autism. They have an 'Outstanding' rating with the Care Quality Commission.

The Challenge

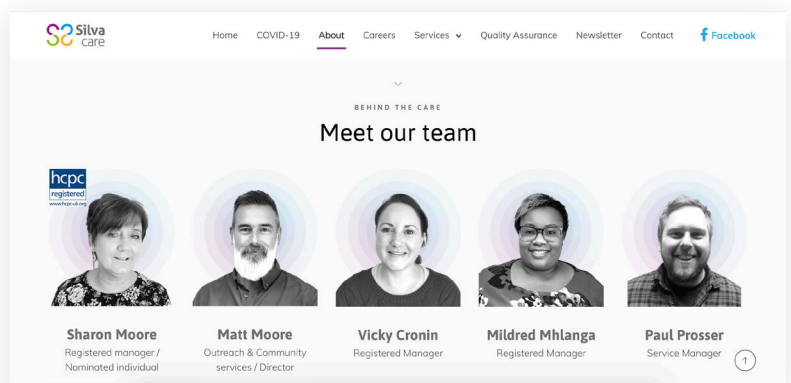

Silva Care came to us with the fantastic opportunity to redesign and develop their site. They are one of the leading care companies in Bristol and needed a website that truly reflected that.

The Result

Working closely with Zack and Beth, we attentively designed the site and structure to be clear, concise and up to today's design trends. Using WordPress, we then moved on to building a fully responsive CMS website; where they could easily edit content and update new job posts and staff section.

The Impact services used for this project included:

- Website Design
- Website Development
- SEO
- Hosting

'About' page

Impact IT helped us with updating our website, sitting down with us and helping plan out the websites design and contents, listening to our ideas and what we wanted for the site. Through the process of creating the site, they would always keep us updated on everything and show us the sites progress. We now have a fresh new website to represent our company, that has all of the contents and information we need on it. The site itself now looks amazing, it has our colour scheme based on the company logo imprinted all over the websites design, images of our staff and service users with nice animation effects and designs added to them.
